

HOW TO PLAY

STEM CELL FLUXX

Stem Cell Fluxx is a game about how cells change, and the rules of the game change as you play! Don't worry, each of the cards has instructions written on it that tell you how to use it.

Stem Cell Fluxx is an easy game to learn because it starts out simple – Draw 1 card, Play 1 card – and becomes more complicated little by little. Add New Rules and use Action cards to gain an advantage over other players. Collect Supplies that will help you fulfil Goals for different stem cell therapies.

Let's play!

Set Up

Start by putting the Basic Rules card in the middle of the table.

Shuffle the deck, and deal 3 cards to each player.

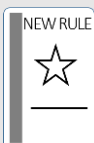

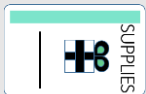

On Your Turn

- Take turns, going clockwise around the table.

1. Draw the number of cards currently required
2. Play the number of cards currently required
3. Discard cards in your hand so you follow the current Hand Limit (if any)
4. Discard Supplies cards so you follow the Supplies Limit (if any)

- Start by following the **Basic Rules** (Draw 1, Play 1). Adapt to **New Rules** as soon as they are played.
- When you play a card, read the entire card. Every card has a description of how to use it and what it does written right on it.
- To win**, have the **Supplies** cards that match the current **Goal** in front of you.

Your table should look like this:

But what do I do with these cards?

Keep the **Basic Rules** card, the deck, and the discard pile in the middle.

When you play a New Rule, put it next to the Basic Rules.

When you play a Goal, put it above the Rules.

When you play an Action, do what it says, then put it on the discard pile.

When you play a Supplies card, put it in front of you.

If you have the Supplies that match the current Goal, you win!
